***Innovations in Automated Control Products and  
Professional Services***

---

- **Founded in 1996**
- **Products and Systems Engineering**
- **Located in Grand Rapids, MI**
- **9 complementary product lines**
- **Certified product trainers on staff**
- **Sales in excess of \$2 million per year**

*At Rock Interface, our mission is to provide quality automated control products with excellent service that meets or exceeds customer expectations.*

**Rock Interface** is the leader in automated control products distribution and professional services and is the only company in Michigan dedicated to distributing many levels of automated control products for today's industrial applications.

The distribution aspect of **Rock Interface Products Group** is focused on PC-based, motion control and communication solutions. We provide a comprehensive line of innovative products that are known for their ease of use, flexibility, performance and cost effectiveness.

The **Rock Interface Systems Group** offers flexible work agreements to either augment the clients' technical staff or provide full service turnkey automated system solutions where client resources are not available. What sets us apart from others is that we train our clients' personnel on our automated system design and programming to enable projects to be maintained in-house rather than locking our customers into a proprietary system. This will keep the cost of ownership down.

**Rock Interface**, with our product line-up and professional services, is in a better position to offer several years of experience in PC-based automation, traditional engineering and consulting capabilities for your facilities applications today.

## COMMUNICATION PRODUCTS
