THE R.O.C.K. BOX

Remote Onsite Communication Kit

Rock Interface is proud to announce the R.O.C.K. Box, a **Remote On-site Communication Kit**. The designed purpose of this enclosure is to allow multiple ways of remote communication to field machines and equipment during a startup or a trouble shooting process. The R.O.C.K. Box allows your startup personnel or field engineers to connect to the home office to lend a hand, getting the job done more efficiently and seamlessly by connecting serial and Ethernet devices to your remote application. The R.O.C.K. Box has various ways to connect to the Cloud – wireless to a hot spot on your phone, local LAN connection or use our optional cell router. The R.O.C.K. Box is your complete portable trouble shooting connectivity tool box!
