

Smart SoftPLC®

General Description

Smart SoftPLC® is an open architecture Programmable Automation Controller (PAC) that provides scalable solutions for a wide range of applications in any industry. Priced to meet the needs of small I/O machine control applications, yet with enough capacity and capability for large process control applications, it's the SMART choice!

The Smart SoftPLC includes all the functions/features of SoftPLC embedded runtime control software including:

- ◆ Deterministic, high speed program execution
- ◆ "Unlimited" user logic and data table memory
- ◆ Ladder logic and data table addressing similar to Allen-Bradley PLC-5/SLC-500
- ◆ Fully documented applications, all documentation resides in the controller
- ◆ Supports user functions written in C++
- ◆ Embedded firewall option with VPN capability for advanced network security
- ◆ Compatible with all HMI/SCADA products
- ◆ Embedded web server option

Smart SoftPLC is programmed and maintained with TOPDOC® NexGen via Ethernet. TOPDOC NexGen is available for the Windows and Linux operating systems.

Communications

SMART provides a rich set of ports for communication:

- ◆ (4) 10/100MB copper Ethernet ports with (2) interfaces for routing capability
- ◆ (1) 10/100MB Fiber Optic port (*option*)
- ◆ (4) RS-232 serial ports
- ◆ (2) factory customizable ports (*RS-485, A-B RIO, A-B DH+, CAN/J1939, modem*)

Industry standard protocols such as ModbusTCP/UDP, A-B Ethernet, DF1, Modbus RTU/ASCII, and others are supported.

I/O & System Configurations

The base Smart SoftPLC can be combined with different "daughter cards" for ultimate flexibility and expandability, tailoring the system to the application requirements, thus lowering cost and complexity.

*Smart SoftPLC w/ Backplane3 Interface
(without and with modules installed)*

*Smart SoftPLC w/
LocalPorts Interface*

*Smart SoftPLC w/ no
local I/O interface +
optional bracket*

Local I/O

SoftPLC Corporation's Tealware™ I/O is the local I/O interface for SMART. Tealware is a modular system which allows for maximum configurability. A wide variety of discrete, analog and specialty modules are available in this robust and proven I/O system.

For small I/O count systems, a "Backplane3" interface supports up to three (3) Tealware modules. The modules mount directly on top of the SMART CPU, making a very compact, yet flexible package.

For larger systems, a LocalPorts interface provides the ability to connect up to twelve (12) Tealware racks. Each rack can support up to 256 digital I/O (8 modules x 32 points/module), for a maximum capacity of 12 x 256 = 3,072 I/O points per CPU. The racks can reside up to 30 feet from the CPU.

Even with the largest systems, SMART is extremely fast. With Tealware I/O, the I/O scan is under 1 msec, even with a fully loaded system of 3072 points.

Remote and Distributed I/O

The Smart SoftPLC can interface to a variety of other vendor I/O systems through the included ethernet and serial ports (eg: Modbus, ModbusTCP), or with add-on PCI-104 interface cards such as DeviceNet, Profibus, ProfiNet, SERCOS, and others.

A Smart base unit can also be configured as a Remote Tealware Ethernet I/O Adapter. This allows for higher I/O counts and distributed I/O configurations.

SPECIFICATIONS

Processor	166 MHz ARM9 CPU, 32-bit
User Memory	63 MB RAM
Removable Memory	128MB Compact Flash, expandable to 8GB
Operating Temperature	0 to 60°C, -20 to 70°C available as option (storage -20 to 85°C)
Humidity	0-95%, non-condensing
Input Voltage Range	14~48 VDC or Power Over Ethernet (POE)
Power Requirements	2-5W based on options selected
Real Time Clock	Battery Free (<i>SuperCap backup for ~60 days</i>)
Communication Ports	(3) RS-232 ports (1 w/ handshake lines) (4) 10/100BaseT Ethernet ports (w/ 2 unique host interfaces-MAC ID's) (1) Multi/Single-Mode Fiber port (optional)
	COM5 Port Options (factory installed): RS-485, 2 wire (default) A-B RIO Master or Slave A-B Data Hwy Plus COM6 Port Options (factory installed): RS-485, 2 or 4-wire A-B RIO Master or Slave A-B Data Hwy Plus CAN / J1939 Phone Modem Others - <i>contact SoftPLC Corp.</i>
Protocols	Serial Modbus Master/Slave, DF1, ASCII
	Ethernet ModbusTCP, DF1 Ethernet, Ethernet/IP Slave
Dimensions (HxWxD)	5.75 x 6 x 1.5 in without modules (146.1 x 152.4 x 38.1 mm) 5.75 x 6 x 5.625 in. with Tealware modules (146.1 x 152.4 x 142.88 mm)
Packaging	Fanless/Diskless system, Metal enclosure DIN-rail Mount, optional Panel Mount Bracket
I/O Interfaces (only one/system)	Backplane3 - 3 Tealware™ modules LocalPorts - 4 connectors, each supports up to 3 Tealware racks PCI-104 - one interface cards Local I/O boards - <i>contact SoftPLC Corp.</i>
Remote I/O	Serial and Ethernet connections
GPS Interface	Embedded NTP Server
Security	Embedded Gatecraft™ Firewall/VPN SSH server for encrypted data transfer
LED's	(4) System Control, (8) Ethernet

Configuration Example - Smart SoftPLC w/ LocalPorts I/O Interface

Smart SoftPLC w/ Ethernet I/O using remote Smart's in Adapter mode

Ordering Information: Order Smart SoftPLC using Cat No SM2S-x-y, where x is the interface option from the table below and y is the License size from the table at the bottom of this page:

B	Backplane3	L	LocalPorts
P	PCI-104	PCI-104 card cover and connector	
<none>		Blank Cover	

Runtime License Sizes			
Digital I/O Capacity	ModbusTCP Servers	Discrete Inputs	Discrete Outputs
128 (LT)	2	128	128
1K	16	up to 1024	up to 1024
2K	32	up to 2048	up to 2048
8K	127	up to 8192	up to 8192
