R.O.C.K. BOX

Remote Onsite Communication Kit

Rock Interface is proud to announce the R.O.C.K. Box, a **R**emote **O**n-site **C**ommunication **K**it. The designed purpose of this enclosure is to allow multiple ways of remote communication to field machines and equipment during a startup or a trouble shooting process. The R.O.C.K. Box allows your startup personnel or field engineers to connect to the home office to lend a hand, getting the job done more efficiently and seamlessly by connecting serial and Ethernet devices to your remote application. Helps reduce travel costs and increases response time. The R.O.C.K. Box has several ways to connect to the Cloud – wireless to a hot spot on your phone, local LAN connection or use our optional cell router. The R.O.C.K. Box is your complete portable trouble shooting connectivity toolbox!

Connect to the Cloud Via WiFi or LAN Using Secomea SiteManager 1549 Included
