Your Problem, Your Solution, Our Technology.

Your company faces the same old problem: How to make money today and how to make money tomorrow?

The varied solutions to this ever-present question do however alter over time. Industrie 4.0, and the digitalization of the information thread that runs throughout the company have brought new and innovative solutions.

They fall into 8 distinct categories where every company is or will be competing within:

1. Data-driven Plant Performance
2. Data-driven Inventory Performance
3. Data-driven Quality Improvement
4. Machines as a Service
5. Human data interface
6. Predictive Maintenance
7. Remote Servicing
8. Virtual Training and Validation

Many of our competitors say that they offer solutions, so maybe EXOR can also tell what you should do? Maybe EXOR should give you the solution that would work in your industry, in your company, in your unique place in the world?

Yet it seems to us that to answer yes to these questions would be to diminish the importance of the challenges that you face. Because your company is unique. You have multiple years of experience in your sector and **only you can provide the solution to your problem**. Only you and your team can truly envisage how to make money today and tomorrow.

What EXOR International can offer you is the ability to securely acquire data from almost any approval critical location across multiple vendor and protocols, powerfully work with this data in real time at the edge and then send this data to a robust cloud to visualize, manipulate and analyse.

With Our Technology, we are able to help you implement Your Industrie 4.0 solution to Your business problem.

That's why EXOR International is a technology provider

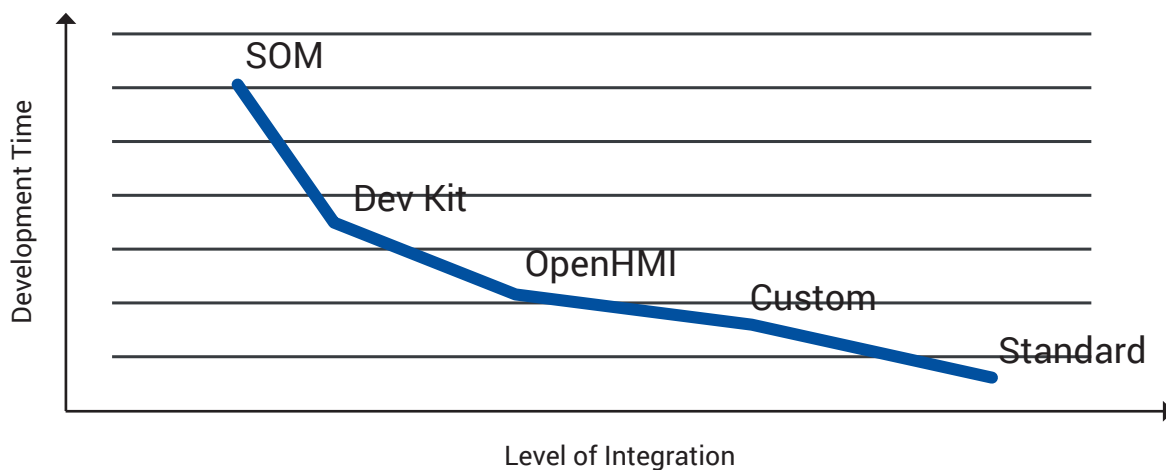

What is the X Platform?

The X Platform unifies all the products and services that fall under the umbrella of EXOR International. From the very smallest building blocks of any IoT project, through the implementation of any of the eight benefits of Industrie 4.0, to the requirement of a custom or standard high-performance gateway or HMI, the X Platform is able to offer the products that you need.

At the component or machine level the X Platform specializes in **smart edge human data interfaces** that are both impressive in their functionality as they are unique in their aesthetic appeal.

At the factory level the X Platform offers **smart edge computing power** that allows the visualization of data simultaneously acquired via multiple protocols from all the major vendors.

The X Platform completes the offers with a **robust industrial cloud** where by the secure visualization of data many of the Industrie 4.0 opportunities can be realized for your unique company.

However the X Platform is not just a technology platform... it includes the nearly 50 years' experience EXOR International has in designing, building, manufacturing and maintaining the software, firmware and hardware necessary for all human machine interfaces. This experience really shows its value when any project comes up against a problem, as all projects do. **It is in these moments EXOR International can demonstrate how effectively the X Platform operates: it truly is a collaborative platform**, ideal for Industrie 4.0 model implementation in industrial, marine, automotive, oil & gas and building sectors.

Visualization and Connectivity Software

The Only Industrial IoT Software you will ever need

In just one easily learned software suite, JMobile **completely covers** the connectivity from edge to cloud, device management, process management and data visualization essential for the all the edge to cloud levels in **any Industrial IoT platform architecture**.

- High User Interface Experience
- Create IIoT ecosystems with reduced risk
- From Shop Floor to Cloud / Big Data
- Real Interoperability
- **Great HTML5 interface with JM4web**
- Create Alarms with associated Alerts
- Efficient scripting with JavaScript
- More than 200 communication protocols readily available for all platforms with gateway function
- Browser widget
- Integrated PLC runtime as an option for compact control solutions. Include full support of networked I/O
- Software and documentation available in 4 languages: EN, DE, FR, ZH
- Multi platform runtime: Linux ,Windows, Windows CE
- **Complete compatibility with OPC UA**

Overview

In just one easily learnt software, JMobile completely covers the connectivity, device management, process management and data visualization essential for the lower levels of any IIoT platform architecture.

For connectivity, with a fully integrated CODESYS PLC, JMobile permits communication to all I/O, Sensors, Motion devices via the significant protocols of PROFINET, EtherCAT, POWERLINK, EtherNet/IP, Modbus amongst many others. Transmitted using the highly robust and secure OPC UA standard and soon pub/sub over TSN, **data is seamlessly shared within the network of edge points as well as sending all data to higher Enterprise levels and external interfaces.**

This exacting communication universally envied as a real technical achievement does not, however, convey the total completeness of JMobile. Born from an industrial market need, this close contact with customers has remained so deeply ingrained in the constant development process that **the beautiful user experience is a defining attribute.** The ease of implementation, using evident stunning graphics elements built into a vast library, allows quick and uniquely defining clear visualization.

As the market moves more towards ever increasingly complex web applications, JMobile is ready. The JMobile client-server architecture is already conversant with current HTML5 web technologies and uses a QT engine and Scalable Vector Graphics, **JMobile4 Web.** This provides users with advanced control and remote supervision from any browser, any device (smartphone, tablet, or computer).

MQTT (MQ Telemetry Transport) is the publish/subscribe protocol designed for constrained devices and low-bandwidth, high-latency networks. It is a common protocol used for light load IIoT communication.

JMobile 4.0 comes with an efficient implementation that seamlessly connects to any MQTT broker, including those offered by providers such as Amazon, Exosite, IBM, Microsoft. The MQTT protocol has been built-in to JMobile runtime as a service with full data gateway capability.

You can easily configure automatic data push from field devices to the cloud. Data security is enforced by the use of TLS and X509 certificates.

CORVINA is an open IoT platform from Exor that connects any products, plants, systems, and machines, allowing data generated IIoT to be processed simply and intuitively with advanced analysis.

CORVINA Cloud is a PaaS (Platform as a Service) and RMM (Remote Monitoring and Management) system. JMobile 4.0 brings the first service for edge data collection to CORVINA.

The simplest approach you can imagine to bring your data to the cloud.

Unified programming approach for native and web HMI applications.

Now it is easier than ever to create screens optimized for visualization on any client while saving programming time.

New JMobile project validation technology makes it simpler creating fully operational applications under all conditions.

The redesign and refactoring of existing JMobile function is the best way to improve programming efficiency while ensuring full compatibility.

It is also a method to keep GUI up to date. In JMobile 4.0 you will find a great new design for:

- Project View with drag&drop to move pages within the project and multiple selections
- Tag Editor with unification of tag database and dictionary, customizable view, multiple editing of common properties, powerful search and synchronization of symbol files
- Alarm Editor with customizable view, powerful search and multiple editing of common properties

Reporting complex data, such as tables (alarms, trends, audits) and trend graphs is possible with the new PDF report function.

PDF files can now have a signature for data security, as required in demanding applications such as those compliant with 21 CFR Part 11.

Communication is always a central point in JMobile applications; even more now that IIoT data collection and edge data processing is becoming the focus in industrial applications.

New in JMobile 4.0 you will find the new CAN Direct protocol, the simplest and most powerful tool to create your own CAN protocols.

Also very important is the new protocol for connecting to Siemens Simatic S7 PLCs with optimized data block programming.

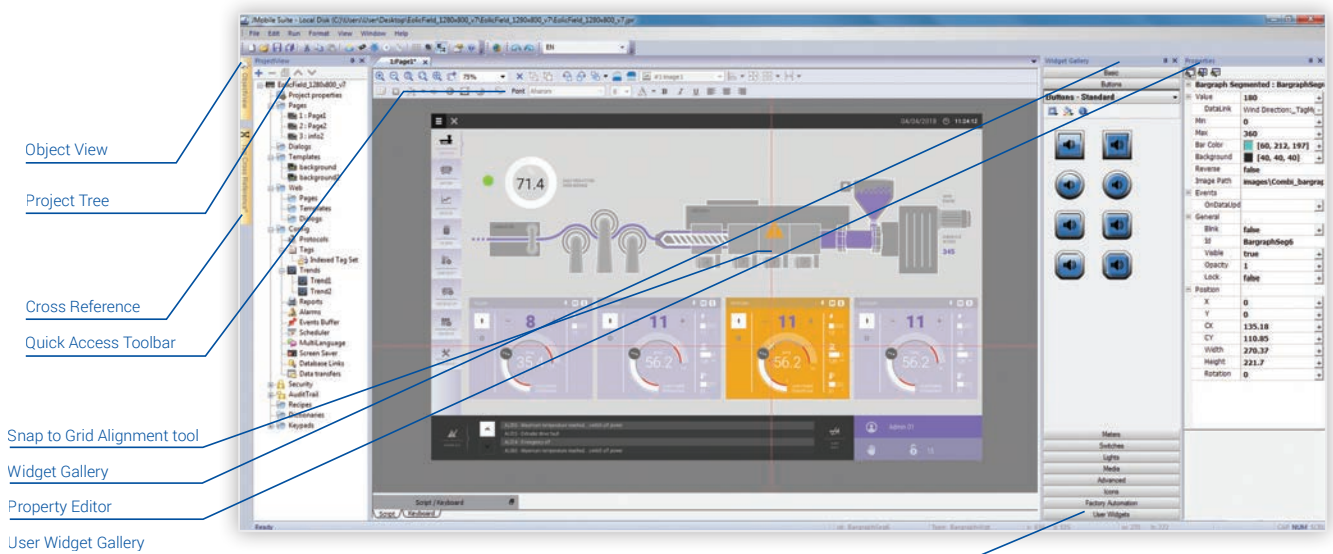

Guiding Principles of Development

The **three principles that have guided and will continue to guide** the development of JMobile are:

1. **Remain open** to the major fieldbus / protocols of communication
2. **Use open and universally recognized** market technological standards such as HTML5, SVG, XML
3. Integrate selected market-leading **3rd party software with a seamless UI and extremely secure.**

These three principles working together offer EXOR International and our customers the best of all situations where the secure, solid JMobile backbone of highly critical software is able to contain and implement all the software required for Industrial IoT implementation.

Version 4.0 Improvement List

- MQTT Service
- CORVINA Interface
- Unified programming of native and web pages
- Project validator
- Project View redesign
- Tag Editor redesign
- Synchronization with symbol files
- Alarm Editor redesign
- Tag Scaling and Type Casting
- Support of tables and graphs in PDF reports
- Signed PDF reports
- JM4web support for generic tables, audit tables, trend tables
- Trend data acquisition up to 10 samples/second
- Trend data acquisition of alphanumeric tag
- Configurable column view for trend tables
- Up to 300 tags for a single datalog
- JS API functions for user management
- More rules for password definition
- Import/export text for message widget in XML
- Live tags in text widgets, Message widgets and alarms
- Historical alarms with collapsed view
- Regional settings as project properties
- BACnet server functions in BACnet protocol
- BACnet JS API function for device and object discovery at runtime
- Play videos from external data sources
- Sending SMSs with PLCM09

New Protocols

- Siemens S7 Optimized Datablocks
- CAN Direct
- IDEC Maintenance
- Keyence KV
- DMX512
- Robox BCC/31
- EATON Suconet K

Pure Web Technology

JMobile 4 Web is the seamless connection between Industrial control applications and ubiquitous mobile devices such as smart phones and tablets.

Developed ahead of the market's vision in 2010 and continuously updated ever since using the very same guiding principles for JMobile, it now provides the most comprehensive Pure Web Technology available.

Designed and maintained by EXOR, a company with 45 years experience in the industrial sector.

- Pure Web Technology
- Created and Developed since 2010
- Based on HTML5/JS
- Secure connection with https protocol support
- 100% HTML5 web HMI Interface
- Ready for responsive design
- Realtime Data Update (up to 10x per second)
- Multitouch Support
- Ready for most common Browsers for PC and Smart Devices with iOS and Android
- Ease of Use. No HTML competence required
- Full JMobile library of over 2000 Widgets
- Available as Component for 3rd party platforms
- Data Acquisition and Trends
- Recipes
- Multilanguage
- Javascript
- User management
- Canvas and custom widgets

Overview

With HTML5 and Javascript technology embedded in JMobile, all that is needed to remotely monitor and control applications is a web browser with HTML5 support: Firefox, Chrome, Safari and Microsoft EDGE. No “apps” needed when operating from mobile devices, hence reducing the risk of compatibility across various operating systems.

With JM4web you can have **instant Web access to JMobile applications** via the integrated Web server included in all JMobile runtime systems.

JM4web allows for creating the **exact responsive user experience** for the target mobile device. The Web server will detect the resolution of the connected client device and serve the appropriate pages.

JM4web is the ideal complement to the powerful remote connectivity and visualization tools already available in JMobile.

Cloud

Connectivity Management

CORVINA Cloud 1.0

CORVINA Cloud 1.0 is an **advanced connectivity management solution that puts you in control of your IIoT business**. Leading seamlessly from the JMCloud offering, CORVINA Cloud 1.0 is powerfully robust, highly scalable and offers advanced VPN capabilities.

The user interface is incredibly clean and easy to use. Web-based it allows all your remote devices, networks and users to be able to communicate securely.

CORVINA Cloud 1.0 **can be offered as an on-premise cloud infrastructure** that delivers the uptime and performance needed for industrial applications and control services at any scale.

Benefits

- **Single click** of the mouse to gain access to all devices
- Enables maintenance and installation **cost reduction**
- Increases Industry 4.0 implementation by completing the **IIoT Whole Product Solution of the X Platform**
- Allows new business services opportunity to final user
- Shows location and status information of all devices in the field
- **Access to web server of device** using standard browser on pc, tablet and mobile
- Creation and management of multiple small entities on the same installation.
- Break up a large enterprise into smaller departments, that shall remain separate and host all of them on a single CORVINA interface.
- Completely **accessible and configurable from browser**

Recent Updates Have Included

Direct access application:

Possibility to create a user that can access only one application on a single device

VNC runtime Password:

Possibility to enable runtime password for VNC connections

Light White Label Branding:

Possibility to customise logos and portal login address for a first level organisation

Cloud credential and other configuration setup using

USB: Possibility to set CORVINA Cloud 1 credential and other parameters using script file on USB

Network Address Translation (NAT) rules on eXware,

eX700 using USB: Possibility to set NAT rules on eXware and eX700 devices using a script file on USB which then functions with CORVINA Cloud 1

PLCM09 3G modem Compatibility:

Usage of the PLCM09 3G modem with CORVINA Cloud 1

Advanced VPN for IIoT Security

A powerful and highly scalable solution that offers **advanced VPN capabilities** with a simple web-based interface allows all your remote devices, networks and users to be able to communicate seamlessly.

Industry standard **encryption technology** ensures your data stays protected in transit for complete IIoT security.

Granular role-based access permissions allow **users to only gain access to required resources and nothing else**.

Isolating for Maintenance and Installation

CORVINA Cloud 1.0 uses a SSL VPN technology (OpenVPN) to allow both installation and maintenance to be made remotely and highly securely.

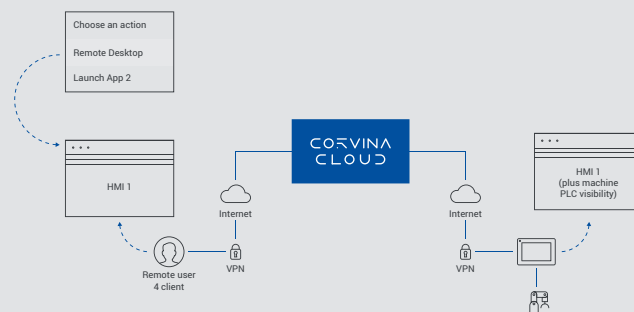

Non functioning devices can be identified from the portal and isolated to be worked on. This can help save time and money and minimize network downtime.

Applications

In traditional VPN solutions, there is no support for helping users to identify or link their local applications to remote VPN resources. This has the consequence that users have to remember IP addresses or require the use of complicated DNS systems.

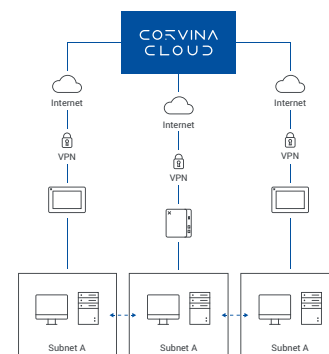

CORVINA Cloud 1.0 solves this issue by allowing you to specify “application links” which will launch a local application on a user’s computer and connect it to a remote resource automatically and with just a single click of the mouse.

Subnet Mapping

One of the most common challenges industrial networks are faced with is the problem whereby multiple locations have the same subnet, making it impossible to implement a central VPN management tool without significant intervention.

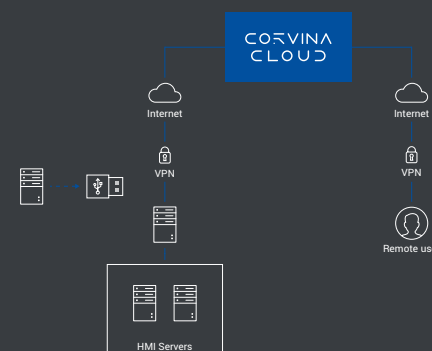

CORVINA Cloud 1.0 is the only solution on the market that can seamlessly resolve this routing nightmare, allowing your deployment to go smoothly.

USB Provisioning

With distributed networks that span large territories, it's common for the IT staff to experience a lot of traveling to deploy network equipment. This takes a lot of time, not to mention incredible cost.

With the USB Provisioning tool, devices can be easily pre-configured on a USB stick and shipped out to their location for a simple, secure installation.

Web access using standard browser

CORVINA Cloud uses web proxy technology to allow usage of standard browser to connect to portal with security HTTPS protocol

It is possible to access to local display of device using VNC client integrated into portal. It is possible to access to web server of device using standard browser

Open Industrial IoT Platform

CORVINA Cloud 2.0

CORVINA Cloud is a **PaaS** (Platform as a Service) and **RMM** (Remote Monitoring and Management) system.

It is the cloud-based, Open Industrial IoT platform that provides the technology you need for the industrial world. It is **The Industrial Cloud**.

It connects any products, plants, systems, and machines, **be they new or legacy**. It allows the data generated by the Internet of Things (IoT) to be processed simply and intuitively with advanced analysis. It **bridges layers between IT and OT architecture**, providing effective tools to access all the industry 4.0 benefits, such as asset performance management, predictive maintenance and OT remote monitoring.

Our Technology that allows you to implement at scale and securely **Your solution to Your problem**: how to maintain competitiveness, grow and maybe just to disrupt.

Usability

EXOR has a long history of making Industrial software. Given the crucial role the software plays in complex and essential environments, **EXOR has always been concerned with the effectiveness, efficiency and satisfaction with which specified users achieve precise goals in particular contexts.**

CORVINA Cloud continues this tradition.

Upon the first startup, the user will find it easy to **become familiar** and able to use CORVINA Cloud's user interface. It is easy for the user to **achieve their objective, navigating smoothly** between the various high-level functions of the platform. Moreover, software design has also made it **easy to recall the multiple services available** on CORVINA Cloud as well as how to use them on subsequent visits.

Deep consideration as to how our clients will use the software leads to a **rapid onboarding of the platform and hence faster access to industry 4.0 benefits.**

Utility

CORVINA Cloud has been designed with a level of functionality that you have come to expect from an innovative engineering company as EXOR. Much effort has been made to offer **all the instruments to ensure CORVINA Cloud meets the needs of the user.**

Users will suddenly without complexity, be able to connect devices to any cloud, to set up roles with associated access limits and to produce multi-level alarms amongst many other functions.

Incredibly within a short time, users will have **powerful asset management performance and maintenance management applications** that will make you wonder why other cloud providers charge for these applications.

Visual Design

Although not often thought of in the industrial sector, visual design is **a crucial element of a thoughtfully made software.**

CORVINA Cloud is used often in white label with sub organisations; the ability to customise the product is essential.

Aesthetics and usability have a positive correlation which helps to communicate your brand to the market.

The visual design of CORVINA Cloud provides a balance between visual appeal, usability and utility unseen in the industrial space.

Functional Integrity

Reliability and high availability have always been a major concern in distributed systems.

Providing highly available and reliable services in cloud computing is essential for maintaining customer confidence and satisfaction and preventing revenue losses.

EXOR is a long term provider of Industrial strength products and software. From the beginning CORVINA Cloud was designed with a solid infrastructure but of more importance have been **the automatic procedures that constantly monitor the state of the system and predict and prewarn of any possible future issues.**

Utility Benefits

PLUG & CONNECT

Simplifies the process of connecting any device to the cloud

DATA MODELING

Optimize the Device connection allowing the creation of Profiles for machine models

MULTITENANT MANAGEMENT

Easy upgrade, easy customisation and ongoing cost savings

CUSTOM SDK

Customize Dashboard with implementing Widget, KPI, data analysis functions

FINE GRAIN ACCESS

Highly specific access constraints to data and functions

GEOLOCATION

Possibility to implement all the functions related to the positioning of the device (Route, GeoFencing, ...)

REST API

Offering great deal of flexibility. Data is not tied to resources or methods.

ALARMS

Protect plant uptime and safety minimizing the number and impact of abnormal situations thanks to the prompt information received by Email notifications.

REMOTE MANAGEMENT

Proactive Service based on Alarm, Remote Support to the Customer

UI CUSTOMIZATION

Placing the visual design in line with your brand provides good secondary sales

DASHBOARD CREATOR

Autonomously increase profits creating dashboard that shows you relevant data for your business

Hardware

Embedded

EXOR Embedded

EXOR Embedded concentrates in Embedded Computer Systems based on ARM architecture which are used in many different professional environments. As one of the most innovative suppliers in the field, we offer our customers know-how and expertise in the areas of:

- electronic system development with BSP, Linux, Yocto and Codesys,
- system integration with support for protocol integration and cloud connectivity, and,
- the production of final almost-finished electronic products.

As a spin off from EXOR International we have nearly 50 years of experience and acquired expertise from a multitude of successfully completed projects in the industrial, marine, automotive and building sectors. Some of the products developed by us have been working in industrial environments for decades proving both the longevity of support and the resilience of design.

One of our strengths is our own specialized in-house production. Over 50,000 electronic units are produced, tested and shipped here annually to a global audience. The finished products of EXOR International provides EXOR Embedded with further understanding of the challenges faced in the industrialization of final products. This expertise along the entire development cycle allow us to assist in the optimization of your production line.

The EXOR Embedded **SOM series** offers great performance, space and cost saving array of products. The SOM catalog is constantly expanded and updated with new versions based on the latest ARM, x86 and FPGA processors to guarantee our customers the possibility of creating competitive and performing product. High computing power and economy of space is a special feature of the design. They offer the possibility to place them in compact devices.

Development kits for all the SOMs enable software development to begin immediately, even if the final hardware design has not yet been decided upon. All common interfaces of the relevant processor are available on the baseboard, so that a complete software development can be performed. Connectivity to CORVINA Cloud is included. Once the development is complete, the relevant SOM can be integrated quickly and easily into your own hardware.

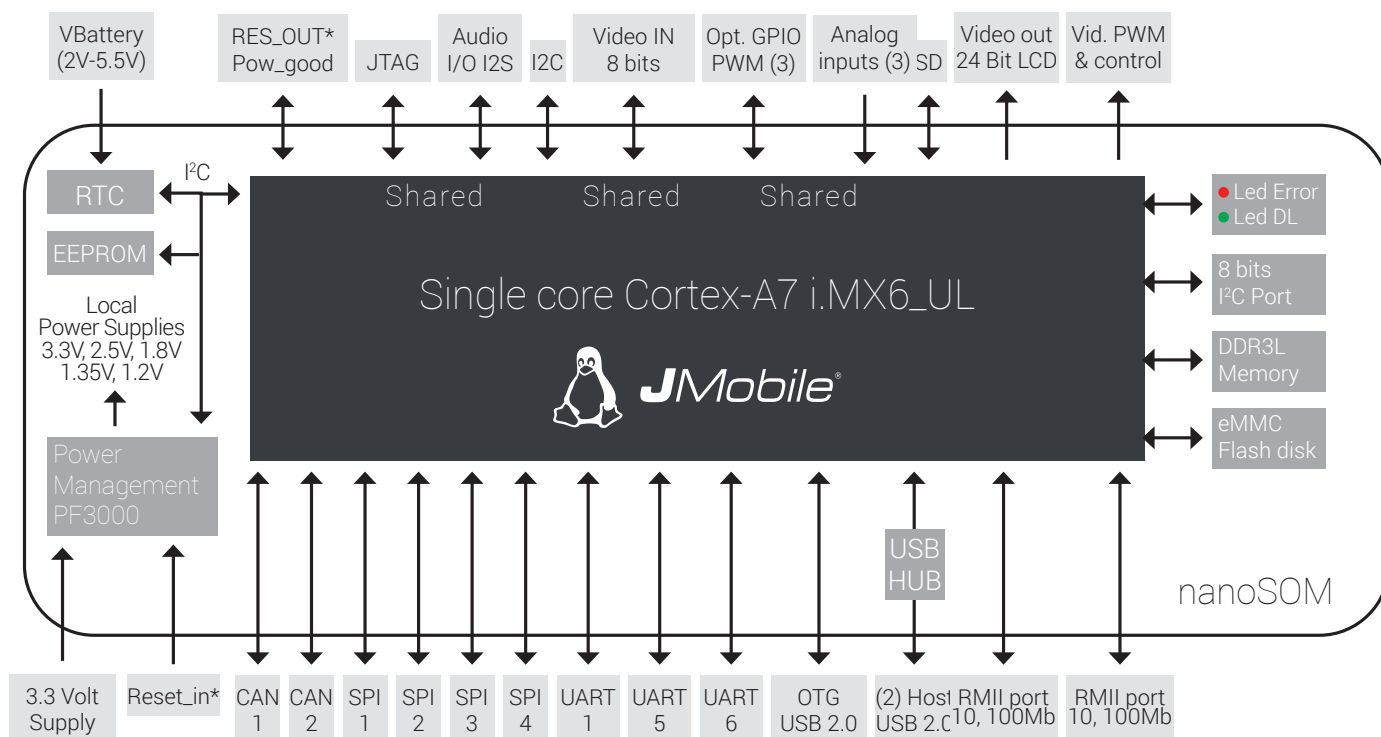

EXOR Embedded also offers its customers open-frame or semi-assembled carrier boards such as the new **OpenHMI kits**. These consist of a single board computer based on nanoSOM connected to a display and touch. OpenHMI technologies guarantee the best time to market for our customers who can integrate our HW directly into their product. Included is a special version of the industrial respected JMobile connectivity and visualization software as well as connection to the industrial cloud, CORVINA Cloud as well as other third party cloud services. Available in different configurations, the products of the OpenHMI family are ideal for the realization of HMI systems and for the development of industrial minipc for the collection and transmission of data from the field to the cloud, smart IoT gateway PC.

nanoSOM nS01 - Technical Data

NanoSOM nS01 is highly innovative, high performance very efficient, ultra compact and cost-effective SOM based i.MX 6 UltraLite CPU ARM Cortex-A7 core.

Dimensions	25,4x25,4 mm
Temperature Range	Commercial 0 to +70°C / Industrial -40 to +85°C
CPU	NXP i.MX6 UltraLite 528 Mhz - ARM Cortex-A7 MPCore with TrustZone and NEON Media Processor unit.
DDR	Up to 1 GByte high performance DDR3L
Flash Disk	Up to 32 GByte eMMC Flash
EEPROM	512 Bytes x 8
RTC	Yes, Battery or SuperCAP backup
Watchdog/RTC/Voltage monitor/JTAG	Yes
USB	2 (Host V2.0), 1 (OTG)
Ethernet	2 (RMII ports 10/100Mb MAC IEEE1588)
SD	1 (via External connectors)

microSOM uS04 - Technical Data

microSOM uS04 is highly innovative, high performance module, based at i.MX8M mini family, that is one ideal successor of well known i.MX6. This family incorporates quad/dual Arm® Cortex®-A53, with addition one Cortex-M4 core.

Dimensions	46x35 mm
Temperature Range	-40°C to 85°C
CPU	i.MX8M Mini Quad/Dual ARM Cortex-A53 at 1.6 Ghz
DDR	LPDDR4 x32 @ 3000 MT / 2 GB
Flash Disk	eMMC 5.0, up to 32 GB on board
EEPROM	I²C, 4 Kbits
FRAM	64 Kbytes
External memory (*)	Direct support for NOR parallel flash or 2 QSPI or additional eMMC SD interface (in case of using must be mounted at external carrier board)

Create Something Different

Use the EXOR Embedded development kits and OpenHMI kits to start your own creative process.

Development kits for all the SOMs, enable software development to begin immediately. This is true even if the final hardware design has not yet been decided upon.

OpenHMI technologies guarantee the best time to market for our customers who can integrate our HW directly into their product.

IoT Gateways

eXware Series

First Step IIoT Compatibility

- Plug and Forget integration into existing infrastructure
- Device data flow easily configured
- JMobile protocols and gateway functions
- JM4web HTML5 interface for web HMI
- CODESYS V3: supports network stacks and local I/O expandability
- Direct OPC UA communications
- CORVINA Cloud secure remote connectivity
- Plug-in module for system expansion
- 2 or 3 Ethernet ports for physical separation of the OT and IT networks
- Rugged and Beautiful all metal design
- Wide operating temperature range
- System settings by web browser
- Trusted and secure Linux-based operating system
- Secure HTTPS/TLS encrypted data transmissions
- Mobile Communication via PLCM09 2G/3G modem
- Support for Geo-Localization*
- IoT data distribution via MQTT

Overview

The eXware series represents a prudent first step into the implementation of IIoT and Industry 4.0 compatibility.

Acting as the **central element in IIoT landscape** the eXware can communicate between automation devices, cloud, fog and applications.

This central role offers companies the chance to start at a uncomplicated level in IIoT and yet allows enormous future expansion into more complex aspects of Industrie 4.0 as the workforce gains knowledge of this form of digital thread process and control.

For **maximum security** the physical separation of the OT and IT networks with two ethernet ports has been provided and this avoids simultaneous attacks.

Secure HTTPS/TLS encrypted data transmissions with signed and packet transfer ensures against data theft and eavesdropping.

Seamless integration is achieved with the vast library of protocols that is common with JMobile software. Existing installations are easily employed and upgraded when necessary and very little programming skill is needed given the brilliant User Interface of JMobile.

Through use as a **gateway**, a powerful **HMI**, a **PLC** with CODESYS V3 or a **secure router**, the eXware facilitates data intensive and complex IIoT applications to be enabled.

PLCM09 Plug-in Wireless Modem

- Designed for eX700 and eXware product families.
- Compatible with operation of CORVINA Cloud secure service
- 2G/3G wireless communication module
- Worldwide connectivity
- Supports GSM/GPRS/EDGE and UMTS/HSDPA/HSUPA cellular networks
- 2 digital inputs/2 digital outputs (SSR) with optical isolation
- 4 LED indicators (module status and network status)
- microSIM slot accessible by user
- Powered via plug-in connection.
- Plug-in extension connector

PLCM09 is a compact and robust plug-in module designed to add Internet connectivity to systems based on eX700 Series and eXware. It is a 2G/3G wireless modem supporting GSM/GPRS/EDGE and UMTS/HSDPA/HSUPA cellular networks.

The device is compatible with operation of EXOR CORVINA Cloud secure service.

In combination with CORVINA Cloud services you can easily implement basic IIoT functions and establish a VPN to protect access to your devices, streamline connection to cloud services.

Secure Mobile HMI in your Hand

- Certified Wireless Safety SIL2 (H4)
- JMobile Integrated
- Easy to Program
- Stunning Design/Ergonomics
- Multiple Integrated Keys
- Potentiometers
- Handwheel
- State Selector
- Bluetooth Safety (H4)
- Additional Wi-Fi Connectivity (H4)
- Magnets to Hang Devices in Convenient place
- Up to 20 m connection for the H3

Overview

The Handheld device range from EXOR is a true HMI in your hand: powerful and easy to program to your needs, they remain the perfect choice for safe mobile requirements.

A specialized section of the market where strict attention must be given to the rigorous safety laws that govern the use of handheld devices.

The wireless option leads to many positive features being enhanced:

- Higher Safety in all areas with no pendant wires to causes issues
- Less injury risks
- No broken cable downtime
- Far less physical fatigue of operator
- Increased concentration of operator

The wireless connection is provided by a Unique electronic key which allows for multiple handheld – machine connections to take place simultaneously without any concern for connectivity and of course safety.

 2. EHEDG / FDA 21 CFR 177.2006

Overview

Where tough legislation requires that handling, preparation, processing and packaging of food is done to be extremely hygienic, the outstanding 7" and 15" Food and Beverage HMI from Exor are the **best choice for manufacturer and final consumer**.

No other company offers such specialized solutions to the everyday problems faced in the Food and Beverage industry and in **particular the meat processing sector**.

The food & beverage and pharmaceutical sectors are very different environments from the industrial world. Although the set up of the production facilities might seem similar, **there are a series of legislative requirements and guidelines that are dramatically more onerous**.

EXOR has adapted its highly successful eTOP500 Series and eX700 Series to meet these challenges. EXOR alters the panels in many areas to comply with the CEI EN 60529 guidelines with an **incredible level of attention to eliminating the accumulation of food, grease, and product powder particles**.

The rugged stainless-steel fronts are **highly polished to allow particles to flow away** from the surface. The frame has the optimal **angle of contact to the machine surface** to both enable cleaning liquids to wash away and also not to allow bacteria or microbes to remain.

All these measures and more mean that EXOR can offer this product at a **high protection front panel rating of IP6**: resistance to highly aggressive corrosive cleaning substances and resistance to frequent washing at high pressure and high temperature.

No longer will you need to contain the panel within a costly cabinet as is so often seen. Industry sectors that might require this series are the **food, pharmaceutical and chemical industries or anywhere, where the highest level of attention to hygiene is a requirement for reputational risk**.

Overview

The eTOP500 Glass with a **class-leading performance rating** it has become the choice for extreme conditions.

Now joined with the harsh environment version of the powerful **eX700 Glass Series**, the benefits of IIoT can reach even the most inhospitable or remote of locations.

Since 2011 EXOR Harsh Environment HMI's have been serving our customers in environments that are not only harsh for the working of the device but where its **reliable operation can be critical** for the safety of operators.

The eTOP500 Glass lived up to this challenge, with a class leading performance rate it has become the **choice for extreme conditions**.

Now joined with the harsh environment version of the powerful **eX700 Glass Series**, the benefits of IIoT can reach even the most inhospitable or remote of locations.

What sets the model apart is the combination of the rugged design with the use of JMobile software which renders the operation of the HMI extremely easy: an important point when the surroundings are difficult.

Connecting to a **vast array of networks and protocols** is achieved via the module design so again aiding the implementation of these HMI within existing architecture.

Entry Level - eSMART Series

Stripped Down Essential Power

When EXOR first introduced to the market the eSMART series in 2015, it was always our intention to **rethink the budget HMI sector**.

With the progress of material engineering and design, we saw no reason why the budget HMI sector had to be offered with such poor levels of technology and particularly aesthetics.

Our belief and the continued engineering investment has now been recognized by the most severe certification organizations in the world.

There is now **no low cost HMI series in the world that can offer the range of features and certificates**, opening dramatically the range of possible applications and industry verticals.

- JMobile programmable
- Browser Programming Widget
- Chromium Web Browser
- OS Linux RT
- HW and FW Optimised for Extremely Fast Operation
- Supports HTML5 and JS
- Resistive Touchscreen
- Powerful CPU
- High Memory Resources
- Extended voltage range 10-32 VDC
- OPC UA Server and Client
- Vast Library of Protocols
- Extremely Robust Design

Overview

The eSMART series of products combine the power of JMobile – the software inside X Platform with an outstandingly robust design.

With very specific applications in mind we have stripped down the eSMART to only the essential components and have created a truly class leading product.

Stripped down does not mean that the product is not robust. In fact it maintains a **IP66 protection rating** for the front of the unit and is certified to a level not seen in the low cost sector worldwide, allowing use in the most hazardous of environments.

Stripped down does not mean a cheap looking ugly product. The eSMART series is without doubt the most elegant in its class. No other fully plastic housed product can match the eSMART quality.

Stripped down does not mean reduction in high level functionality. Although the display is not at the incredible real life level of the eX700 series, the unique connectivity ability of JMobile – the software inside X Platform, allows the eSMART to communicate with a vast library of critical protocols as well as OPC UA standard and pub/sub server and client.

IoT Controller

IoT Controller - eX700 Series

Revolutionary IIoT Controller

Exor has updated its flagship product the eX700 Series and gone much further, creating the ultimate all-in-one solution ready for scalable applications across many industries.

Super High Performance, High Resolution Glass Cap Touch, Fully Connectable upstream & downstream, Powerful Integrated PLC w/ all the major protocols, Integrated VPN with Service Cloud, all with up to a 5 year warranty available.

- Created Within the X Platform
- Industry 4.0 Product Concept
- HW and FW Optimised for Extremely Fast Operation
- System and Project Rapid Boot-Up
- OS Linux RT
- JMobile – the software that powers the X Platform
- CODESYS V3 with Ethernet I/O Stacks
- Multitouch and Gesturing
- Brilliant 2,100,000 pixel Display
- Wide Angle Visibility
- Beautiful 16,000,000 Colors
- Resistant to Scratches, UV and Chemicals
- Total Glass Design
- Network Separation possible via Up to 3 Ethernet
- Networks with different IP addresses
- Plug in Modules for System Expansion
- IECEx, ATEX, DNV-GL, EU RO MR, Lloyd's Register, cULus, cULus Haz. Loc., RCM

Overview

A beautiful product, created within the X Platform and hence with an unsurpassed ability to offer access and scalability into Industry 4.0. The tremendous technical flexibility is backed by a company with 45 years in the industry and still with a market price at previous models.

The eX700 Series represents a ground breaking product to come to market:
The Revolutionary IIoT Controller.

The product's concept permits a prudent investment into the implementation of IIoT and hence Industry 4.0 compatibility.

As such it provides a true all-in-one solution covering many functions such as:

- As a powerful **Browser** with industry standar Web engine powering state of the art Chromium browser
- As a **Gateway** with up to 3 Ethernet networks, OPC UA pub/sub* Server and Client, future TSN connectivity* and multiple protocols
- As a powerful **HMI** using JMobile inside with multi-touch operation in a brilliant high resolution display
- As a **PLC** with the CODESYS V3 can function as Master through major protocols

Classic HMI

Classic HMI - eTOP500 Series

Solid as a rock

- 5 Year Warranty
- Innovative mechanical design and all-metal enclosure
- Available in different sizes from 4.3" to 15"
- High-performance touchscreen HMI's
- Brilliant displays with LED technology all in full color
- Gateway function, remote installation of application and remote assistance
- Ethernet, USB, serial ports and MPI integrated
- Optional plug-in modules for fieldbus systems and networks
- Support SD Card
- Coating on all Electronic Boards
- Optional IEC 61131-3 integrated PLC (CODESYS V2 or V3)
- Front available in three colors (White/Black/Silver)
- Special versions for special applications

Overview

The eTOP Series 500 combine state-of-the-art features and **top performance with an outstanding design.**

The eTOP Series 500 come with a choice of certifications and approvals that make them the **solution of choice for all requirements.**

Smart Edge

Smart Edge - JSmart Series

When aesthetics and functionality meet, the market changes

- from 5.0" to 21.5" TFT color display,
- up to a resolution 1920x1080 pixel with 16M colors, dimmable backlight
- PCAP Touchscreen Multitouch with swiping and zooming
- 10/100 Ethernet port PoE single cable for power and ethernet
- Wi-Fi Connection
- up to a ARM Cortex-A9 quad core CPU
- Full IP67 protection; ideal for mounting-arm installation right at the machine
- Mounts on 22 mm hole
- Includes environment and motion sensors
- Can be used with cable up to 100 m distance from source

Overview

Every once and a while a new product arrives that changes the market. It influences the perspective of all participants by encouraging them to question the status quo. And challenging that which has been done before is when innovation leads to a lasting difference being created.

EXOR International would like to invite you on this journey of imagination and discovery by introducing the JSmart family of Smart HMI Field Devices. A product that seems as if from the consumer world of smartphones, tablets and PCs and yet a robust industrial grade product that will last multiple years.

We have worked for many years to redesign nearly 80% of the internal components on the board to accommodate an incredibly beautiful and slim casing. Looking at the product from any angle there is a sense of tranquillity and purity that belies the potent technology that lies beneath.

Up to a quad-core Cortex A9, multi-touch and robust glass front, a full set of motion and environment sensors and wifi interface all add up to provide you with a vast possibility of applications.

Challenge what has come before.

Industrial PC

EPC - Entry-level Panel PC

Fanless Panel PC

EXOR fanless Panel PC adopts an all-in-one concept that integrates a single board computer, TFT LCD Panel with LED backlight, and user-friendly touch screen within a slick and compact IP65 chassis.

Designed to serve as a flexible and reliable industrial computing platform, each Panel PC and Monitor is a compact, highly integrated, network-ready computer with exceptional I/O connectivity. The industrial-grade machinery computer from EXOR is designed for use in any light industrial environments.

Overview

All products are available in wide and flexible range of configurations. You will have the product that fits your needs. All products have a robust mechanical construction that will suit the most demanding of applications.

Products can be configured with a different choice of CPU, RAM, disk and operating systems.

PC offered by EXOR International are the ideal system for running applications based on JMobile PC Runtime.

An application integrating HMI on a powerful hardware platform is ready in all cases where the embedded HMIs do not meet all requirements.

IPC - High-end Panel PC

Heavy Industrial Panel PC

EXOR heavy Industrial Panel PC is equipped with powerful Intel® Processor, TFT LCD Panel with LED backlight, and user-friendly touch design.

EXOR Industrial Panel PC provides expansion slots for add-on boards in a IP66 heavy-duty aluminum front bezel and vibration-resistant, its rugged design of aluminum chassis is suitable for any harsh industrial environments.

Overview

All products are available in wide and flexible range of configurations. You will have the product that fits your needs.

All products have a robust mechanical construction that will suit the most demanding of applications.

Products can be configured with a different choice of CPU, RAM, disk and operating systems.

PC offered by EXOR International are the ideal system for running applications based on JMobile PC Runtime.

An application integrating HMI on a powerful hardware platform is ready in all cases where the embedded HMIs do not meet all requirements.

Panel

- LCD size: 21.5", 16:9
- Resolution: Full HD, 1920 x 1080
- Luminance: 300cd/m²
- Contrast ratio: 5000
- LCD color: 16.7M
- Viewing angle: 89(U), 89(D), 89(L), 89(R)
- Backlight: LED

Touch (for eTOP-IPC2170P Series)

- Ten points P-Cap (projected capacitive touch)
- Light transmission: 87%
- Interface: USB
- Anti-scratch surface: >= 7H hardness

System

- CPU (optional): support 4th gen. Intel® Core™ i processor family, LGA1150 socket type
- Core™ i5-4590T, Quad Core, 2.0GHz, 6M Cache (maximum frequency 3.0GHz if turbo boost enabled)
- Core™ i5-4570TE, Dual Core, 2.7GHz, 4M Cache (maximum frequency 3.3GHz if turbo boost enabled)
- Core™ i3-4350T, Dual Core, 3.1GHz, 4M Cache (no turbo boost)
- Core™ i3-4340TE, Dual Core, 2.6GHz, 4M Cache (no turbo boost)
- Pentium® G3320TE, Dual Core, 2.3GHz, 3M Cache (no turbo boost)
- Celeron® G1820TE, Dual Core, 2.2GHz, 2M Cache (no turbo boost)
- BIOS: AMI BIOS
- System chipset: Intel® Q87 PCH
- System memory (optional): 2 x 204-pin DDR3/DDR3L SO-DIMM socket, support up to 16GB DDR3/DDR3L 1333/1600, non-ECC and unbuffered
- Storage device:
 - 1 x External locked CFast socket
 - 1 x mini-PCIe w/o SIM card holder slot to support mSATA storage
 - 1 x Hard drive bay: support 1 x 2.5" SATA HDD/SSD (optional)(for DC model only)
- Watchdog timer: Watchdog timeout can be programmable by software from 1 second to 255 seconds and from 1 minute to 255 minutes (tolerance 15% under room temperature 25°C)
- H/W status monitor: monitoring system temperature and voltage
- Expansion:
 - 2 x mini-PCIe sockets (support optional Wi-Fi or 3.5G module/NVRAM/mSATA storage)
 - 2 x Expansion slots for add-on PCI or/and PCIe cards (optional)
 - 1 x PCI and 1 x PCIe x4 slots
 - 2 x PCIe x4 slots
 - 2 x PCI slots
 - 1 x PCIe x16 slot

Rear I/O

- 1 x PS2 for keyboard/mouse
- Ethernet: 2 x RJ45

- 2nd/3rd display: additional independent DisplayPort: 1 x DVI-I (DVI-D + DVI-A) and 1 x DisplayPort
- Audio port: 1 x Line-out; 1 x Line-in; 1 x Mic-in
- USB: 4 x USB3.0
- 3-pin remote power on/off switch connector
- Reset button
- COM#1: RS232/422/485 w/ 5V or 12V selection
- ATX power switch

Top I/O

- COM#2 RS232/422/485 w/ 5V or 12V selection

Audio

- HD codec: Realtek ALC886-GR
- Audio interface: Line-out/Line-in/Mic-in audio jack

Ethernet

- LAN chip: dual Intel® I210IT Gigabit LAN
- Ethernet interface: 10/100/1000 Base-Tx Ethernet compatible

Fieldbus

- Two FBI Windows

Mechanical & Environment

- Color: Pantone 432C/RAL 70 24 front bezel
- IP protection: IP66 front
- Mounting: panel/wall/stand/VESA 100mm x 100mm

eCC / eCCF - Compact box computers

Compact Series Fanless Computer

Powered by Intel®, these compact box computers feature significant I/O design.

The compact series fanless computer is ideal for space-critical and simple or complex applications, such as data acquisition, digital signage, gate control, self-service system, Kiosk, and POS applications.

Overview

All products are available in wide and flexible range of configurations. You will have the product that fits your needs.

All products have a robust mechanical construction that will suit the most demanding of applications.

Products can be configured with a different choice of CPU, RAM, disk and operating systems.

PC offered by EXOR International are the ideal system for running applications based on JMobile PC Runtime.

An application integrating HMI on a powerful hardware platform is ready in all cases where the embedded HMIs do not meet all requirements.

- Default: onboard Intel® Celeron® processor N3350 Dual Core, 2.4GHz
- Option: support Intel Atom® E3900 processor family from Dual Core
- E3930 to Quad Core E3950 (by request)

Main Memory

- 1 x DDR3L SO-DIMM socket, support DDR3L 1866 8GB RAM max., un-buffered and non-ECC

Display Option

- 1 x DP display

I/O Interface-Front

- ATX power on/off switch
- 1 x Storage/2 x GPO programmable LED
- 1 x SIM card holder
- 2 x Intel® I211AT GbE LAN ports; support WoL, teaming and PXE
- 1 x DP display output
- 2 x USB 2.0
- 2 x USB 3.0
- 3 x Antenna holes for optional Wi-Fi/3.5G antenna
- I/O Interface-Rear
- 3 x DB9 for COM1 & COM2 & COM3
- COM1/COM2: full RS232 signal
- COM3: RS422/485 auto flow control
- 1 x Line-out
- Support 12V/24V DC input

I/O Interface - Internal

- 4 x GPI and 4 x GPO (programmable to GPI or GPO)
- 1 x DB9, only support RS232, Tx/Rx/GND single

Storage Device

- Onboard 16GB EMMC, max up to 32G by request

- Optional M.2 B, BM key 2242 module

Expansion Slot

- 1 x mini-PCIe socket for optional Wi-Fi/3.5G module and 2 x M.2 slot for optional Wi-Fi/Bluetooth and LTE modules

Power Requirements

- Power input: 12V/24V DC +/-10%
- 1 x Optional 24V, 60W power adapter

Support OS

- Linux Kernel version 4.1 with 16GB eMMC
- Windows 10 IoT Enterprise with 32GB eMMC

Dimensions

- 162mm (W) x 26mm (H) x 150mm (D) without wall-mount bracket

Construction

- Metal chassis with fanless design

Environment

- Operating temperature:
- Ambient with air flow: -5°C to 55°C (according to IEC60068-2-1, IEC60068-2-2, IEC60068-2-14)
- Storage temperature: -20°C to 75°C
- Relative humidity: 10% to 95% (non-condensing)
- Shock protection:
- M.2/EMMC: 50G, half sine, 11ms, IEC60068-27
- Vibration protection w/M.2 or EMMC condition:
- Random: 2Grms @ 5~500 Hz, IEC60068-2-64

I/O Interface-Front

- ATX power on/off switch
- LEDs for HDD LED, batty LEDs, power LED, COM port Tx/Rx, 5x programmable GPO LEDs
- 1 x External SD card
- 1 x SIM card holder
- 2 x Intel® I210AT GbE LAN ports, support WoL, teaming and PXE
- 1 x DP display output
- 1 x DVI-I display output
- 1 x USB 3.0 (900mA per each)
- 3 x USB 2.0 (500mA per each)
- 2 x RS232/422/485 support auto flow control
- Jumper-free setting on RS232/422/485
- Support 2.5KV isolation protection on COM1
- 1 x 3-pin DC input, typical 24V DC input with $\pm 20\%$ range

Storage Device

- 1 x 2.5" SSD/HDD (SATA 2.0) - front accessible
- 1 x SD card (data storage only)
- 1 x mSATA

Expansion Slot

- 2 x mini-PCIe socket for optional Wi-Fi/3.5G/4G LTE/fieldbus modules

Power Requirement

- Typical 24V DC input with $\pm 20\%$ range, with reverse polarity protection
- 1 x Optional 24V, 60W power adapter

Dimensions

- 85mm (W) x 157mm (D) x 214mm (H)

Construction

- Aluminum and metal chassis with fanless design

Environment

- Operating temperature: Ambient with air flow: -5°C to 55°C (according to IEC60068-2-1, IEC60068-2-2, IEC60068-2-14)
- Storage temperature: -20°C to 80°C
- Relative humidity: 10% to 95% (non-condensing)
- Shock protection:
 - HDD: 20G, half sine, 11ms, IEC60068-2-27
 - SSD: 50G, half sine, 11ms, IEC60068-2-27
- Vibration protection w/ SSD condition:
 - Random: 2Grms @ 5~500Hz, IEC60068-2-64
 - Sinusoidal: 2Grms @ 5~500Hz, IEC60068-2-64

Certifications

- CE approval
 - EN61000-6-2
 - EN61000-6-4
- FCC Class A
- LVD
- UL60950

Support OS

- Windows 7 PRO, 32bit/64bit
- Windows Embedded Standard 7, 32bit/64bit
- Windows 10 IoT, 32bit/64bit

eCCF200	+70ECCF200	Intel® Celeron® J1900 Quad Core 2.0GHz Factory Automation Fanless System with Fieldbus Expansion Ability

eCCF300 - Technical Data

CPU Support

- Support 6th generation Intel® Core™ i7/i5/i3 LGA socket type processors
 - Core™ i7-6700TE, Quad Core, 2.4GHz, 8M Cache (maximum frequency 3.4GHz if turbo boost enabled)
 - Core™ i5-6500TE, Quad Core, 2.3GHz, 6M Cache (maximum frequency 3.3GHz if turbo boost enabled)
 - Core™ i3-6100TE, Quad Core, 2.7GHz, 4M Cache (no turbo boost)
 - Pentium G4400TE, Dual Core, 2.4GHz, 3M Cache (no turbo boost)
 - Celeron® G3900TE, Dual Core, 2.3GHz, 2M Cache (no turbo boost)

Main Memory

- 2 x DDR4 SO-DIMM socket, supports 2133MHz and up to 8GB with un-buffered and non-ECC type

Display Option

- Dual independent display -HDMI + DVI-D

Front I/O Interface Status LEDs

- 1 x Battery/1 x C-Fast LEDs
- 4 x GPO status/2 x Tx/Rx LEDs
- 1 x Power/1 x HDD access LEDs

Front I/O Interface

- 1 x ATX power on/off switch
- 1 x HDMI and 1 x DVI-D
- 4 x USB 3.0 ports (900mA per each)
- 2 x USB 2.0 ports (500mA per each)
- 1 x Line-out and 1 x Mic-in
- 2 x Antenna holes for Wi-Fi/ GSM
- 1 x Front access 2.5" HDD tray
- 1 x mini-PCIe expansion support optional modules
- 2 x RS232/422/485 auto with 2.5KV Isolation
- 3 x Intel® I210IT GbE LAN ports, support WoL, teaming and PXE

Top I/O Interface

- 1 x 3-pin remote switch
- 1 x CFast expansion
- 1 x SIM card

Storage Device

- 1 x CFast (SATA 3.0)
- 1 x 2.5" HDD (external, SATA 3.0)
- 1 x 2.5" HDD (internal, SATA 3.0)
- 1 x mSATA (via internal mini-PCIe socket)

Expansion Slot

- eCCF300: no expansion
- Power Requirement
 - AT/ ATX power mode (default with ATX power mode)
 - Power input: typical +24VDC ±20%, with reverse polarity protection
 - Power adapter: optional AC to DC power adapter (+24VDC, 120W)

Dimensions

- eCCF300: 90 mm(W) x 185mm (D) x 251mm (H)

Construction

- Aluminum and metal chassis with front access design

Environment

- Operating temperature: Ambient with air flow: -5°C to 55°C (according to IEC60068-2-1, IEC60068-2-2, IEC60068-2-14)

MON - Panel Monitors

Heavy Industrial Touch Monitor

Most of EXOR heavy Industrial Touch Monitor shares identical appearance with IPC or EPC series for the same industrial environment application.

Overview

All products are available in wide and flexible range of configurations. You will have the product that fits your needs.

All products have a robust mechanical construction that will suit the most demanding of applications.

eTOP-MON1205T1 Technical Data

Panel

- LCD size: 12.1", 4:3
- Resolution: XGA 1024 x 768
- Luminance: 500cd/m2
- Contrast ratio: 700
- LCD color: 16.7M
- Viewing angle: 70 (U), 70 (D), 80 (L), 80 (R)
- Backlight: LED

Touch Screen

- 5-Wire resistive (flush panel type)
- Light transmission: 80%
- Interface: USB and RS232

Rear I/O

- Touch screen interface port: RS-232 (1 x DB9)/USB type A
- Video port: VGA (1 x DB15)/DVI-D (1 x DVI-I connector)/DisplayPort
- DC power input connector: 3-pin Phoenix terminal Blocks

OSD Function

- OSD keypad
- Multilanguage OSD

Mechanical & Environment

- Color: Pantone black and black silver chassis box
- IP protection: IP65 front
- Mounting: panel/wall/stand/VESA 100mm x 100mm
- Power
- Power input: 12V~24VDC

Power adapter: optional AC to DC power adapter (+12V, 60W)

- Vibration
